EVERGREEN®
ULV 5-25 GROUND

Engineered to Eliminate

Effective Mosquito Control

EverGreen® ULV 5-25 Ground is an oil-based contact insecticide formulated with botanically based pyrethrins (Group 3A) and synergized with piperonyl butoxide (PBO) to kill mosquitoes on contact.

Features and Benefits

- Intended for use by mosquito abatement agencies
- May be applied undiluted or diluted with a suitable oil
- Synergized with PBO to combat metabolic resistance and increase effectiveness
- Labeled for use by air or ground in residential, industrial, recreational, agricultural and other areas where adult mosquitoes occur

Packaging

- 5 gallon unit
- 30 gallon drum
- 55 gallon drum
- 275 gallon tote

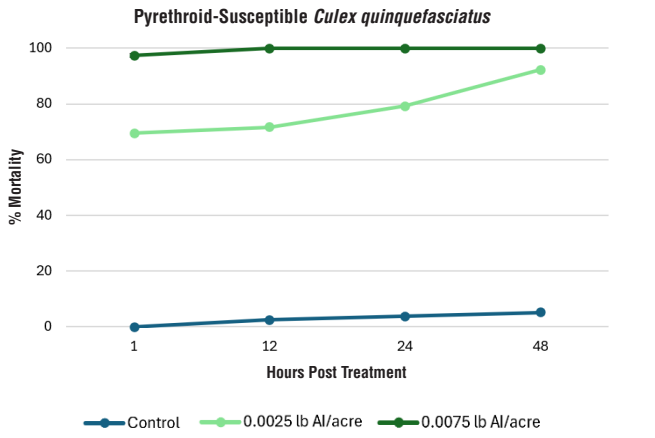
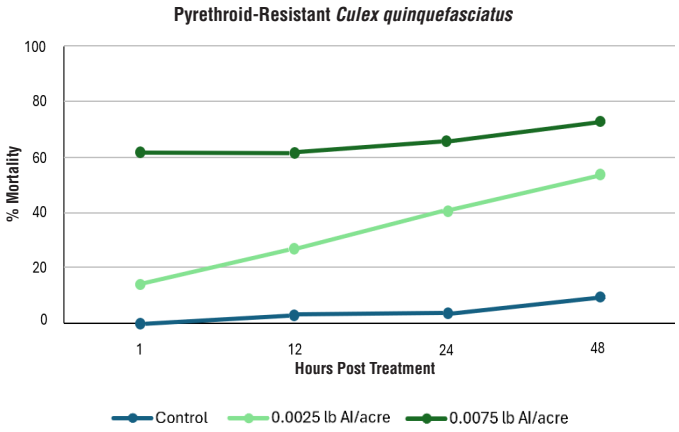
Efficacy of 5% Pyrethrins and 25% PBO ULV Application Against Culex quinquefasciatus



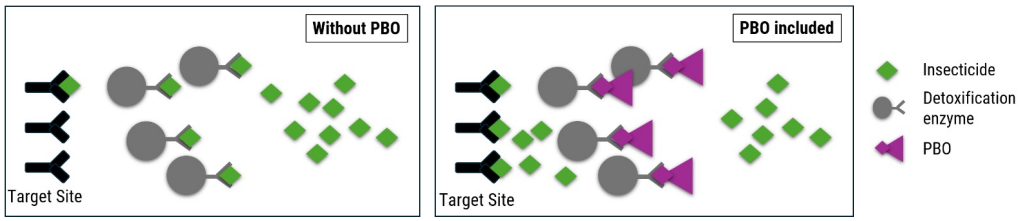


Source: EcoZone International, LLC. (Steven Su), 2020.

What does this data mean for your organization?

Whether mosquitoes are pyrethroid-susceptible or pyrethroid-resistant, EverGreen ULV 5-25 Ground reduces mosquito populations. This ensures abatement agencies can protect communities even when resistance is present.

Piperonyl Butoxide Enhances Insecticide Efficacy



To have a lethal effect, the active ingredient in an insecticide needs to reach its target site within the insect. Resistant insects commonly have a heightened defense mechanism, cytochrome P450 enzymes, that attack insecticides. PBO binds to these detoxification enzymes, allowing the insecticide to reach its target site and work more effectively.
