
SHOCK WAVE® 1
Flushing, Killing & Residual Aerosol

Flush. Kill. Control.

Multi-Active Insect Control for Livestock Operations

Shockwave® 1 Flushing, Killing & Residual Aerosol is formulated with five active ingredients (Groups 3A and 7C) and is designed to flush insects from harborage areas, kill by contact and provide residual control of a variety of crawling and flying insects. This ready-to-use aerosol contains NyGuard® IGR, an insect growth regulator that helps target the entire insect population and stop the next generation of insects.

Features and Benefits

- For use in and around unoccupied areas of livestock facilities, offices and vehicles
- Provides flush, kill and residual control of cockroaches, flies, spiders and other listed insects
- Contains NyGuard IGR for dual modes of action to control immature and adult insects
- Dual-synergized to combat metabolic resistance and increase effectiveness
- Does not drip or leak, even when sprayed upside down

Packaging

- 17 ounce aerosol can (12 per case)

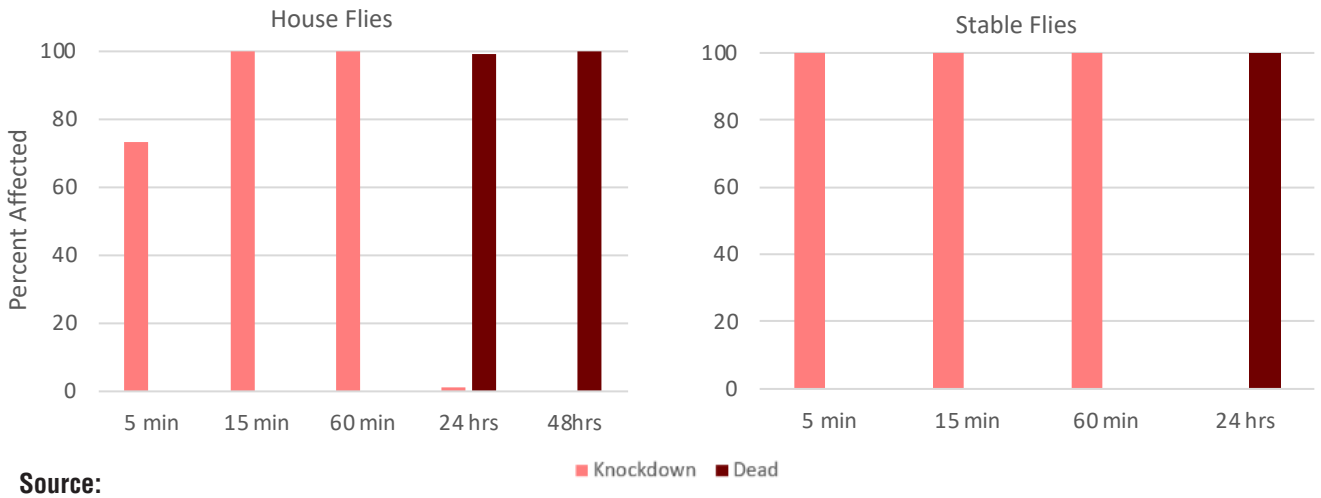
Efficacy of Shockwave® 1 Flushing, Killing & Residual Aerosol as a Space Spray Application

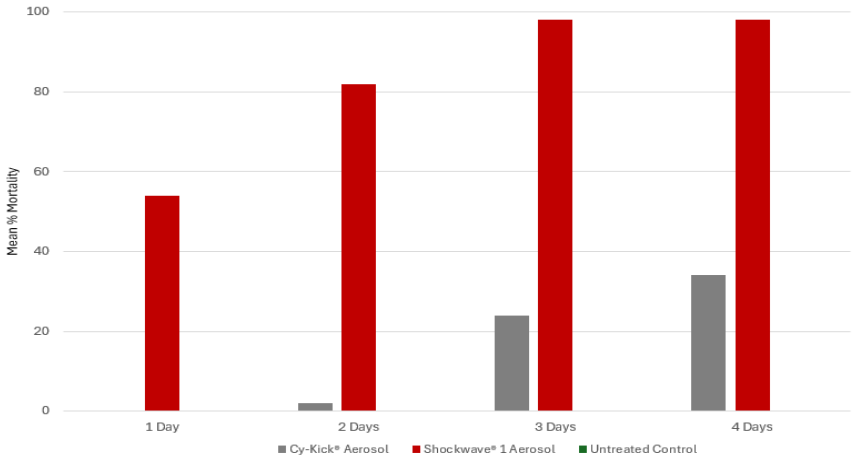


Source:
i2L, 2016.

What Does This Data Mean for Your Business?

Shockwave 1 delivers knockdown and kill of house and stable flies to help reduce insect pressure and support production and profitability. Its residual control helps minimize disruption to daily operations and maintain biosecurity.

German Cockroach Mortality Following Exposure to Ceramic Tiles Treated and Aged 8 Weeks



Source:
MGK lab study, 2018.

What Does This Data Mean for Your Business?

Shockwave 1 not only flushes German cockroaches from harborage areas, it continues working after application. Residual performance helps maintain insect control between treatments, reducing reinfestation pressure and providing more consistent results.
